Filing Tips Memo

Internal note, March 2023. Fictional.

SUPERSEDED by Handbook v3 on 2026-09-18. Kept for reference only.

M1. Purpose

M1.1 This memo collects practical tips from the safety team for preparing data review requests. It was written for new staff who handle inspection records and need a short guide to common situations.

M1.2 Keep copies of every document you send, and record the date of each request in the tracking sheet.

M1.3 Ask the driver for a short written account as soon as the inspection report arrives, while the details are fresh.

M2. Filing tips

M2.1 Inspection requests may be filed up to 5 years after the inspection date.

M2.2 If a defect is repaired within 24 hours of the inspection, send the repair invoice and request removal of the violation.

M2.3 Any citation that shows the word dismissed can be filed.

M2.4 Two inspections on one truck on one day should be filed as a duplicate.

M2.5 A clear driver statement is usually enough to support a request.
